EDUCATION

University of Boumerdès — **Boumerdès,Boumerdès**
Applied Mathematic

WORK EXPERIENCE

Yassir — **Algiers, Algeria**
Software Engineer — *June 2026 - Present*

- Backend & APIs: Built transaction services in Node.js/TypeScript (NestJS, MongoDB) for a mobile airtime top-up platform, focusing on clean query design, validation, and reliability.
- Integrations & Domain Logic: Integrated the DT One Digital Value Services API and modeled transaction lifecycles, deriving business states like abandoned and stuck orders from event history.
- Cloud & Observability: Ran services on Google Kubernetes Engine with Datadog APM — distributed tracing, custom metrics, and dashboards for production monitoring.
- Full-Stack Collaboration: Contributed across the stack, building the ops dashboard alongside the backend endpoints powering it in a fast-moving product environment.

Sabil — **Algiers, Algeria**
Software Engineer — *April 2025 - March 2026*

- Backend & Systems: Developed backend services using Go and Python, focusing on performance, reliability, and clean architecture.
- Frontend Development: Built modern web interfaces using SvelteKit for fast, lightweight, and maintainable user experiences.
- AI & Automation: Worked with AI models and automation pipelines, integrating intelligent features into production workflows.
- Full-Stack Collaboration: Contributed across the stack, bridging frontend, backend, and AI components in a fast-moving product environment.

BrandRescue.au — **Adelaide, Australia**
Full-Stack / Cloud Engineer — *May 2023 - April 2025*

- Automation & Cloud: Gained hands-on experience designing automated workflows and infrastructure using AWS services to improve deployment reliability and operational efficiency.
- Security Practices: Worked on application and cloud security best practices, including access control, environment hardening, and secure deployment patterns.
- Modern Web Stack: Contributed to a production application built with Next.js, focusing on performance, scalability, and maintainability.

Caterings Hub *(formerly foodtrucker)* — **Adelaide, Australia**
Full-Stack Developer — *May 2023 - Present*

- End-to-End Development: Designed and maintained the platform's frontend (Next.js) and backend (NestJS), leveraging PostgreSQL, Redis, and Elasticsearch for optimized data management and search capabilities.
- Cloud and Infrastructure: Deployed and managed scalable applications using AWS, Docker, and Traefik, with CI/CD pipelines to ensure seamless development and deployment.
- Feature Implementation: Built dynamic dashboards, subscription systems, event management tools, and category specific functionalities, tailored to enhance user experiences.
- System Optimization: Integrated Elastic Stack for monitoring, solved performance bottlenecks, and ensured platform reliability and scalability to support business growth.

Piassa — **Algiers, Algeria**
Software Developer — *Dec 2022 - Mar 2023*

- Standalone Application Development: Designed and built a desktop inventory management system using Electron and React, tailored for a car parts shop.
- State Management and Efficiency: Implemented robust state management solutions in React to handle complex data flows and ensure smooth user interactions.

Freelance

Full-Stack Developer *Dec 2020 - Present*

- Website Development: Built custom websites using Node.js, ensuring modern design principles and optimal performance tailored to client needs.
- SEO Optimization: Implemented advanced SEO strategies, including metadata optimization, schema markup, and performance enhancements, to boost search rankings.
- Top Rankings Achieved: Delivered websites that consistently ranked in the top 5 of their specified categories, driving increased visibility and traffic for clients.

PROJECT EXPERIENCE

Self (Oink Royale) **Algiers**
Game Dev *Sep 2019 - Sep 2019*

- Developed a fun casual game using Unity Engine and published it to the Google Play Store.

Self (Recipe Book) **Algiers**
Flutter Dev (Mobile Dev) *Sep 2020 - Sep 2020*

- Designed in Flutter a recipe app with multiple screens and different categories, as well as the option to filter recipes to your taste.

LEADERSHIP EXPERIENCE

Shellmates Club **Algiers**
Communications *Sep 2021 - Sep 2022*

- Wrote articles demonstrating vulnerabilities and security risks to raise awareness and educate readers.
- Participated in internal events, including workshops and Capture The Flag (CTF) competitions, to enhance security skills and knowledge.

SKILLS & INTERESTS

Skills: Full Stack Development, JavaScript, TypeScript, Go, Python, React, Next.js, NestJS, Express.js, PostgreSQL, Prisma, Elasticsearch, Docker, Kubernetes, Traefik, AWS, API Development, Web Scraping, Jenkins, RabbitMQ, Datadog, GCP

Interests: Cloud Computing, DevOps, Cybersecurity, Ethical Hacking, CTF Challenges, Networking, Self-Hosting, Automation, Open Source
